## STEP 1

With the ignition switched off and the parking brake set, disconnect the negative battery cable on the passenger's side with a 10mm Socket/Wrench.

**IMPORTANT:** Failure to disconnect the battery for a minimum of 2 hours may cause the Check Engine Light to illuminate upon completion of the installation or

Cookie Preferences **at operation. DO  
NOT SKIP THIS STEP!**

## STEP 2

Lift the engine cover and remove it from the vehicle.

## STEP 3

Unfasten the MAF harness wire from the clip on the airbox lid and pop out the clip on the resonator.

## STEP 4

[Cookie Preferences](#) t the MAF harness  
from the sensor.

## STEP 5

Disconnect the CCV hose  
from the stock intake tube.  
Squeeze the hose clamp and  
pull out.

## STEP 6

Loosen the hose clamp by the  
throttle body and stock  
airbox with a 10mm  
Socket/Wrench and remove  
the stock intake tube from  
the vehicle.

## STEP 7

Unfastening the two clips  
securing the stock airbox lid.  
Remove the stock airbox lid  
and filter.

## STEP 8

Remove the three screws  
securing the stock airbox  
with a 12mm Socket/Wrench.  
These screws will be reused in  
Step 16.

## STEP 9

Carefully remove the MAF sensor from the stock intake tube and install it onto the Intake Tube (B) with the supplied 8-32 Screws (M), MAF Plate (L), MAF Gasket (K) with a Screwdriver.

## STEP 10

Remove the grommet and metal bushing from the stock airbox. Removing the metal bushing first will help to remove the grommet easier.

[Cookie Preferences](#)

## STEP 11

Install the grommet into Airbox (A) first and then the metal bushing.

## STEP 12

Install the Tube Seal (E) onto the Airbox (A).

## STEP 13

Install the Fender Seal (H) onto the Airbox (A).

## STEP 14

Determine if you want to install the Auxiliary Scoop (P) or Box Plug (Q) on the Airbox (A). See the “Air Box Plug” note to decide the desired setup.

## STEP 14 (IMAGE 2)

## STEP 15

Place Airbox (A) into the truck.

[Cookie Preferences](#)

## STEP 16

Use the screws removed in Step 8 and secure the Airbox (A) with a 12mm Socket/Wrench.

## STEP 17

Insert the Intake Tube (B) into the Airbox (A).

## STEP 18

Install the Coupler (D) onto the throttle body with two #52 Hose Clamps (N) then insert the Intake Tube (B) into the coupler. Tighten all hose clamps.

## STEP 19

Reconnect the CCV hose and hose clamp into the CCV vent on the Intake Tube (B).

[Cookie Preferences](#)

## STEP 20

Install the Air Filter (C) onto the Intake Tube (B) and tighten the #88 Hose Clamp (O).

## STEP 21

Press the Lid Seal (G) into the grooves on top of the Airbox (A).

## STEP 22

Remove the protective covering on the Clear Lid (F) then install the clear lid onto the Airbox (A) with the 1/4-20 Screws (J) and Washers (I) using a Screwdriver.

## STEP 23

Reconnect the MAF harness into the sensor.

## STEP 24

Reinstall the engine cover.

## STEP 25

Reconnect the negative terminal on the battery. Inspect your installation, make sure the kit is properly positioned and all fasteners are secure. Affix the ID label near the intake kit. The installation is now complete.
