

INDUSTRIAL INJECTION CAC BOOT KIT, BLACK - 2007.5-09 CUMMINS 6.7L

Take control of your boost and eliminate weak points in your charge air system with the Industrial Injection CAC (Charge Air Cooler) Boot Kit for 2007.5–2009 6.7L Cummins. This high-performance boot kit is engineered from premium materials designed to handle elevated temperatures, high boost pressures, and the harshest driving condition

Part Number :	22A458
Fits :	Built for 2007.5–2009 6.7L Cummins
Part Type :	CAC Boot Kit
Part Brand :	Industrial Injection

PRODUCT FEATURES

- Built for 2007.5–2009 6.7L Cummins – Direct fit, no guesswork
- Premium, High-Strength Construction – Engineered for extreme durability
- Withstands High Boost & Heat – Designed for performance under pressure
- Eliminates Factory Weak Points – Prevents blowouts and leaks
- Black Finish – Sleek, clean look under the hood
- Ready for Work or Play – Ideal for stock or modified trucks

Whether you're towing heavy, racing, or just want peace of mind, this kit delivers maximum durability and long-lasting reliability where it counts. Say goodbye to blown factory boots and boost leaks—this upgrade was built to stand the test of time.

If you're looking for a serious upgrade over your factory CAC boots, this is it. Built to last, tested to perform—this is the boot kit your Cummins deserves.

Made to Handle the Pressure | Built by Diesel Experts | Industrial Injection Quality
