THE

BLACK DIAMOND

COATING MAKES THE DIFFERENCE!

VICTOR REINZ[®]

Sealing Products

Victor Reinz® MLS Head Gaskets with **BLACK DIAMOND™** coating – available for the **6.0L & 6.4L Power Stroke®** engines!

These Victor Reinz head gaskets, with advanced Black Diamond™ coating technology are:

- Constructed of (5) five stainless steel layers
- Utilizing patented integrated push rod locators
- Coated with a Victor Reinz proprietary fluoroelastomer (rubber) coating

The coating seals and impregnates into the mating component surface where it decreases friction forces and allows controlled sliding of the mating components relative to the gasket without fretting or damage to aluminum engine components.

The Black Diamond coating is soft enough for cold sealing and features maximum adhesion, increased durability and temperature resistance and is also resistant to engine fluids including gas, oil and coolant.

VICTOR REINZ Part # 54450A/54579A/54657
